Summary

Motivated Computer Science student specializing in backend development with Spring Boot, Spring Security, JWT, and MySQL. Strong problem-solving skills in Java, with hands-on experience building secure, scalable, and high-performance systems. Committed to continuous learning, clean architecture, and effective team collaboration.

Projects

CloudNest App – React, Spring Boot, MongoDB, Tailwind CSS, Clerk

- Developed a full-stack platform enabling users to securely upload, view, download, delete, and share files.
- Implemented public/private visibility toggles, shareable links for public files, and role-based access via Clerk authentication.
- Designed a responsive UI with Tailwind CSS and Lucide icons, and built REST APIs for seamless frontend-backend integration.

AI Video Generation Platform – Vite, React, Spring Boot, Replicate API, Gemini API

- Built a web platform to generate AI-driven videos from text prompts using the Replicate API.
- Integrated Google Gemini API for enhanced creative input processing and scene generation.
- Developed secure REST APIs in Spring Boot to handle video generation requests and delivery.

Real-Time Feedback Chat-bot (SIH) – JavaScript, Gemini API

- Built a chatbot that captures user feedback through real-time conversation.
- Utilized Gemini API to process, analyze, and display sentiment-driven responses.

Internship

Software Engineering Intern – Japan Grab Technology (India)

Oct – Nov 2023

- Explored modern technologies used in service-based startup environments.
- Gained hands-on experience with tech workflows, developer tools, and Agile practices.
- Understood the basics of client delivery, service architecture, and deployment pipelines.

Education

B.E. in Computer Science and Engineering, Siddaganga Institute of Technology

2022–2026

GPA: 7.64

Class 12 (2021): 88% Class 10 (2019): 72% (Nepal)

Certifications

Data Structures, Algorithms in Java (2024) – Arrays, Strings, Stacks, Queues, Linked Lists, Trees, Algorithms

Spring Boot for Beginners – Amigoscode (2025) – REST APIs, Controllers, Services, Dependency Injection

Technical Skills

Languages: Java, JavaScript, SQL, MongoDB

Backend: Spring Boot, JWT, Spring Security

Frontend: React, HTML, CSS

Tools: Git, Postman, VS Code

Coding Practice

LeetCode: 220+ problems — GeeksforGeeks: 400+ problems

Key Skills

Problem Solving — Collaboration — Time Management — Critical Thinking
