EDUCATION

Siddaganga Institute of Technology <i>Bachelor of Engineering in Computer Science and Engineering – CGPA: 7.64</i>	Tumkur, Karnataka <i>Dec 2022 – Jun 2026</i>
--	---

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, SQL
Backend: Spring Boot, Spring Security, Node.js, Express, REST APIs, JWT, JDBC
Frontend: React.js, Next.js, Vite, Tailwind CSS, HTML5, CSS3
Databases: MongoDB, MySQL, Neo4j
Tools & Cloud: Git/GitHub, Docker, Vercel, Render, Maven, Postman

EXPERIENCE

Canada Life <i>Incoming Associate Software Engineer</i> – Selected for an upcoming software engineering role, preparing to contribute to enterprise-scale backend systems.	Remote <i>Starting Jul 2026</i>
Chiac ASI <i>Superintelligent Evangelist</i> – Engineered AI-driven systems focusing on intelligent query processing and context-aware article retrieval. – Coordinated workflows across development stages, optimizing backend integrations and API performance.	Remote <i>Feb 2026 – Present</i>
JapanGrab Technology (India) <i>Student Intern</i> – Worked in an Agile setup with daily standups, sprint planning, and rigorous code reviews. – Gained hands-on exposure to CI/CD pipelines and industry-grade deployment workflows.	Bangalore, Karnataka <i>Oct 2023 – Nov 2023</i>

PROJECTS

PIMS (Pharmacy Information Management System) <i>MERN Stack</i>  Live  Code – Engineered a scalable, production-grade pharmacy platform managing prescriptions, unified patient health records, and real-time pharmaceutical inventory tracking using the MERN stack. – Implemented comprehensive Role-Based Access Control (RBAC) with stateless JWT authentication, securely isolating operational workflows for Doctors, Pharmacists, Admins, and Patients. – Designed backend architecture featuring immutable audit trails for stock mutations, ensuring regulatory compliance and preventing fulfillment of out-of-stock critical medications.	Jan 2026
Vishal Tailor Digital Platform <i>Next.js, React</i>  Live  Code – Architected a high-performance Next.js application prioritizing SEO and fast load speeds. – Integrated automated hero image rotation and consistent alignment for a premium visual identity. – Developed interactive digital business cards with QR code generation via html2canvas.	May 2026
Knowledge Graph Query System <i>Python, Neo4j, NLP</i>  Live  Code – Architected a RAG pipeline to resolve complex natural language queries against Neo4j. – Leveraged NLP for precise entity extraction, reducing query ambiguity in contextual searches. – Engineered optimized Cypher queries for sub-second relationship traversal across nodes.	Oct 2025

CERTIFICATIONS & ACHIEVEMENTS

Smart India Hackathon Finalist (Oct 2024) – Built an AI-powered real-time feedback chatbot using Google Gemini API.
Data Structures & Algorithms in Java – Mastered core topics like trees, linked lists, stacks, and sorting (2024)
Docker & Git – Completed comprehensive project-based learning for CI/CD and version control (2025)

CORE COMPETENCIES

System Architecture | REST API Design | Agile (Scrum) | CI/CD Pipelines | Retrieval-Augmented Generation (RAG)
