PROFESSIONAL SUMMARY

Associate Software Engineer at Canada Life with expertise in enterprise backend development, Spring Boot, full-stack product architectures, and AI semantic retrieval workflows. Computer Science graduate from Siddaganga Institute of Technology with a proven track record in building multi-role healthcare platforms, personal knowledge engines, and guarded AI search agents.

PROFESSIONAL EXPERIENCE

Canada Life

Associate Software Engineer

Bangalore, Karnataka (Hybrid)

Jul 2026 – Present

- Building production software as a full-time Associate Software Engineer in a hybrid engineering environment.
- Engineering maintainable backend services, RESTful APIs, and reliable software architectures prioritizing security and performance.

Chiac ASI

Superintelligent Evangelist / AI Developer

Sheffield, UK (Remote)

Feb 2026 – May 2026

- Developed AI-driven query processing systems and context-aware article retrieval agents to optimize search relevance.
- Coordinated engineering workflows, optimized backend API integrations, and implemented prompt-safety guardrails.

Japan Grab Technologies

Student Intern

Bangalore, Karnataka (Hybrid)

Oct 2023 – Nov 2023

- Practiced collaborative software development workflows in an Agile setup with daily standups and code reviews.
- Gained early software industry experience with continuous integration and containerized deployment workflows.

EDUCATION

Siddaganga Institute of Technology

Bachelor of Engineering in Computer Science & Engineering

Tumkur, Karnataka

Nov 2022 – May 2026

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, System Design.

TECHNICAL SKILLS

Languages:	Java, TypeScript, JavaScript, Python, SQL
Backend Engineering:	Spring Boot, Spring Security, Node.js, Express, FastAPI, REST APIs, JWT, RBAC
Frontend & UI:	React.js, Next.js, Redux Toolkit, Tailwind CSS, Vite, HTML5, CSS3
Databases & Storage:	MongoDB, PostgreSQL, MySQL, Mongoose, Firebase
Tools & DevOps:	Git/GitHub, Docker, Postman, Vercel, Render, pnpm Workspaces, VS Code

FEATURED PROJECTS

PIMS (Patient Information Management System) | React, Node.js, Express, MongoDB, JWT

[Live Demo](#) | [GitHub](#)

- Engineered a multi-role healthcare platform managing prescriptions, patient records, inventory tracking, and notifications.
- Implemented stateless JWT authentication and strict RBAC across Doctors, Pharmacists, Admins, and Patients.

Knowledge Vault | React, TypeScript, Express, MongoDB, TanStack Query

[GitHub](#)

- Architected a markdown wiki platform with internal wiki links, article version history, search, and admin moderation controls.

NeuralQuery (AI Knowledge Base Agent) | FastAPI, Python, React, TypeScript, Gemini

[GitHub](#)

- Built a semantic search agent with FastAPI and Google Gemini that ranks and explains knowledge-base matches with prompt injection guardrails.

New Vishal Tailors Digital Platform | React, TypeScript, Express, pnpm Workspace

[Live Demo](#) | [GitHub](#)

- Architected a multilingual business application and digital storefront monorepo with QR generation and inquiry workflows.

CERTIFICATIONS & ACHIEVEMENTS

- **SpringBoot for Beginners (Amigoscode)** — REST APIs, Dependency Injection, Backend Architecture (2025)
- **Learn Git by Doing (Udemy)** — Version Control, GitHub Copilot Workflow (Credential ID: UC-57d53899) (2025)
- **Docker: A Project-Based Approach (Udemy)** — Containerization & DevOps Fundamentals (Credential ID: UC-2827526f) (2025)
- **8-Week Advanced DSA Program (GeeksforGeeks)** — Data Structures & Algorithms in Java (2024)
